

[SCI 2020 Abstract Submission Form](#)

Please be sure that all names, affiliations, and content is written as you wish it to appear in the online conference materials.

Name of presenter:

Team/lab/project members:

Affiliation(s):

Funding source(s) (if applicable):

Please select the type of poster you plan to present:

- Lab Overview** (provides general information about the central questions tackled by the lab, primary technique(s), and lab members) – format most appropriate for junior faculty.
- Research Project** (should include long-term research goals and indicate areas where additional expertise would be helpful) -- format most appropriate for specific projects from senior faculty and trainees
- Topic Review** (should include similar information as a research project, but include broader questions/areas for future investigation) – format most appropriate for meta analyses, literature reviews, advocacy groups, etc.
- Research Resource** (should include information on: what the resource is for, who can use it, how to learn more about it, how to register/obtain it) – format most appropriate for investigators or non-profit organizations with a tool or resource they wish to increase awareness about.

Please select who is presenting the poster:

- Undergraduate student
- Graduate/Medical student
- Postdoc/Resident
- Research Assistant
- Primary Investigator/lab head
- Advocacy group/non-profit representative
- Other: _____

Please briefly describe how presenting this poster will help achieve the long-term research goals or project goals:

Abstract Text (500-word limit), please be sure to include:

1. Title
2. The 'big picture' research question or project goal(s)
3. Brief, simple explanation of research methods or research tool/resource works
4. Current project status and short-term next steps (please avoid using technical jargon)
